

CORESITE, FORMERLY CRG WEST, PREPARES 20,000 SQUARE FEET OF NEW SPACE AT CHICAGO DATA CENTER

Raised-floor space provides 2 MWs of power available for immediate occupancy as either a private, single-customer data center or cage-to-cabinet colocation service area.

Denver, CO – June 30, 2009 – National data center, colocation and peering provider, CoreSite (formerly CRG West), is pleased to announce completion of 20,000 square feet of new space at the company's downtown Chicago data center. The announcement follows the launch of the company's new name and corporate identity last week.

The new space will accommodate increasing demand for data center space in downtown Chicago. CoreSite's Chicago data center is located in the heart of the financial district, where it serves more than thirty customers and offers access to some of Chicago's major financial exchanges. Located at 427 S. LaSalle with 2N emergency generator back-up power as well as an N+1 cooling and UPS configuration, the new space is move-in ready for companies of all sizes, industries and requirements. The data center also features a return-air plenum, allowing for hot aisle containment to maximize energy efficiency.

CoreSite's Chicago data center is SAS 70 Type II certified and includes security features such as mantraps, biometric readers, and 24-hour on-site security. Branch-circuit monitoring technology was installed to allow customers the ability to view their power consumption, provide more reliability and enable CoreSite to deliver its leading usage-based power pricing model.

"We take great pride in building out data center space the right way, with strong, redundant reliable infrastructure to provide a reliable, well-connected home for our customers' mission-critical ICT systems," commented Billie Haggard, Vice President of Data Centers for CoreSite. "Our goal is to design, build and manage our data centers with our customers' success in mind. We provide them with an environment that promotes and accommodates their future growth and do the job right."

About CoreSite

CoreSite partners with customers to provide reliable, secure data centers that improve business continuity and promote the growth of their ICT infrastructure. The company builds and manages data centers across the United States, offering more than two million square feet of wholesale data center space and colocation services to more than 500 customers. A wholly owned operating partner of The Carlyle Group, one of the world's largest private equity firms, CoreSite delivers the level of security, service, and network access businesses need to compete in the global marketplace.
