

## **CORESITE TO ADD SIX MEGAWATTS TO ITS NORTHERN VIRGINIA DATA CENTER**

***Expansion to include increased redundancy and energy efficiency with water-side economization and other initiatives.***

**Denver, CO – August 18, 2009** – National data center, colocation and peering provider, CoreSite, announced today a planned six Megawatt expansion of its Northern Virginia data center located in Reston at 12100 Sunrise Valley Drive. The additional capacity will be delivered by December of this year.

CoreSite will be implementing a number of initiatives to bolster energy efficiency levels in the expansion space, including water-side economization, variable speed fan air conditioning units, 95%-efficient UPS units, Tier II generators (lower pollutants than Tier I), and zoned lighting. Each initiative will play a key role in ensuring the data center is highly energy efficient and achieves a P.U.E. below 1.5.

Upon completion of this latest expansion phase, CoreSite's Northern Virginia data center will offer a total power capacity of 12 Megawatts. The additional private data center rooms and cage-to-cabinet colocation space will feature access to CoreSite's Any2 Northeast exchange. Last month, CoreSite announced the connection of its Northern Virginia, Washington, DC and New York data centers. With more than 50 networks and service providers at both CoreSite's Washington, DC-area data centers and its New York data center, Any2 Northeast offers access to over 100 networks between the two markets. Any2 is distributed among the regions allowing customers to peer with as many networks as possible.

"CoreSite's expansion in Northern Virginia demonstrates our commitment to building data centers with our customers' success in mind," affirmed Billie Haggard, CoreSite's Vice President of Data Centers. "Increased energy efficiency provides existing and prospective clients with increased flexibility, reliability and sustainability."

"Demand in Northern Virginia continues to be strong," commented Jonathan Litvany, Vice President at CoreSite. "Our robust product mix along the continuum of wholesale data centers and cage-to-cabinet colocation space, coupled with our network density in the area, has been well received by customers. We are pleased to provide this latest in a series of expansions in the Northern Virginia market to meet our customers' growing needs."

### **About CoreSite**

CoreSite partners with customers to provide reliable, secure data centers that improve business continuity and promote the growth of their ICT infrastructure. The company builds and manages data centers across the United States, offering more than two million square feet of wholesale data center space and colocation services to more than 500 customers. A wholly owned operating partner of The Carlyle Group, one of the world's largest private equity firms, CoreSite delivers the level of security, service, and network access businesses need to compete in the global marketplace.
