

# M11

**2115 NW 22nd St., Miami, FL 33142**

CoreSite's Miami data center (M11) is designed to help accelerate global digital transformation for businesses across all industries. Whether you need subsea connectivity to the South American market, a data center that guarantees business continuity, or access to tier one cloud and network providers, we have you covered.

With more than 45,000 square feet, M11 is a modern, purpose-built data center facility that offers state-of-the-art mechanical and electrical infrastructure to future-proof your business and is constructed to withstand a Category 5 hurricane. Operating in the downtown Miami area since 2006, the team of experts deliver 24x7x365 security and optimal customer experience and provide field operations and remote hands support.

## BUILDING

### Space

|                    |                                                                                                     |
|--------------------|-----------------------------------------------------------------------------------------------------|
| Square Footage     | 45,000+                                                                                             |
| Deployments        | Partial cabinets, full cabinets, cages, private suites and build-to-suit<br>Rooftop space available |
| Power Availability | AC and DC                                                                                           |
| Fitout             | Powered shell, infrastructured shell and turn-key                                                   |

### Floor

|                     |                                                           |
|---------------------|-----------------------------------------------------------|
| Floor Load Capacity | Floor 1: 250 lbs./sq. ft.<br>Floors 2-3: 150 lbs./sq. ft. |
| Clear Height        | 15' above solid floor                                     |

## PRODUCTS AND SERVICES

### Interconnection

|                                      |                                                                                                               |
|--------------------------------------|---------------------------------------------------------------------------------------------------------------|
| Software-Defined Networking Platform | Open Cloud Exchange®                                                                                          |
| Peering Exchanges                    | Any2Exchange® for Internet peering and FL-IX                                                                  |
| Diversity                            | Three diverse points of entries                                                                               |
| Carrier Availability                 | See our carrier list located at <a href="https://www.coresite.com/carrier-list">CoreSite.com/carrier-list</a> |
| Cross Connects                       | Single mode fiber (SMF)                                                                                       |
| Enterprise Internet                  | Blended IP, 10Mbps to 10Gbps                                                                                  |

### Colocation

- Partial Cabinets
- Full Cabinets
- Cages
- Private Suites and Build-to-Suit
- AC Power Circuits
- DC Power Circuits
- Antenna

### Services

- Remote Hands
- Public Cloud Providers
- Additional Cloud Services

### Compliance Certifications

SOC 1 Type 2, SOC 2 Type 2, ISO 27001,  
NIST 800-53, PCI DSS, HIPAA

## FACILITIES

### Security

|                   |                                                                               |
|-------------------|-------------------------------------------------------------------------------|
| Access            | Key cards, biometric scanners, 8' perimeter fence, and controlled site access |
| Cameras           | Perimeter and interior IP-DVR                                                 |
| Security Officers | 24x7x365 security qualified personnel                                         |

### Structure

|                   |                                                  |
|-------------------|--------------------------------------------------|
| Elevators         | Passenger/freight: 7'w x 4' d x 9'h (5,000 lbs.) |
| Hardened Exterior | Built to withstand Category 5 wind standards     |

### Efficiency

|             |                                                                                                |
|-------------|------------------------------------------------------------------------------------------------|
| Electrical  | Eaton double conversion UPS                                                                    |
| Life Safety | Dual-interlock pre-action dry-pipe sprinkler system                                            |
| Mechanical  | Hot/cold aisle configuration                                                                   |
| Monitoring  | RF Code readers for pin-point accuracy of temperature and humidity within customer deployments |

### Reliability

|              |                                                           |
|--------------|-----------------------------------------------------------|
| Utilities    | Diverse utility feeds                                     |
| Generators   | N+1 redundancy                                            |
| Remote Hands | 24x7x365                                                  |
| Uptime       | 100% uptime SLA                                           |
| UPS/PDU/RPP  | 2N redundancy                                             |
| Mechanical   | N+1 cooling system                                        |
| BMS Controls | State-of-the-art mission-critical controls and monitoring |
