

Enterprise-Class, Fully Optimized

Blended IP – Dedicated Internet Service

CoreSite's Blended IP is an ideal solution for scalable, fully optimized internet service. For businesses that require production-level internet, our Blended IP offers 100% SLA uptime that is achieved through a blend of Tier-1 carriers and fully redundant hand-offs. With quick setup and flexible bandwidth options, Blended IP makes sense for almost every use case and provides expanded bandwidth management and public cloud connectivity.

WHAT IS IT?

With service rate options ranging from 100Mbps to 10Gbps, Blended IP offers dedicated internet access to multiple internet paths with a choice between single connections for traditional connectivity or fully redundant connections for mission-critical applications. When you include Blended IP in your CoreSite deployment, you gain access to multiple upstream internet service providers (ISPs). Instead of a single ISP, CoreSite uses an ecosystem of on-site providers with intelligent routing, via BGP, that selects the most efficient internet path for the fastest route possible.

BENEFITS

- ✔ Streamlined management – one combined bill for internet and your data center solutions
- ✔ Improved performance – dedicated bandwidth, ultra-low latency
- ✔ Commitment-free - Enjoy a predictable monthly fee with no long-term contract
- ✔ Flexible – different options for connectivity, bandwidth and routing
- ✔ Reliable – SLA-backed service
- ✔ Lowest-latency Tier-1 ecosystem

BLENDED IP CAPABILITIES

Service rate options range from **100Mbps to 10Gbps**

Enable on-ramps for direct access to major cloud providers with Blended IP

Single or dual handoff options

72-hour activation interval

Includes 11 customer useable IP addresses; larger IP blocks reviewed on individual case basis

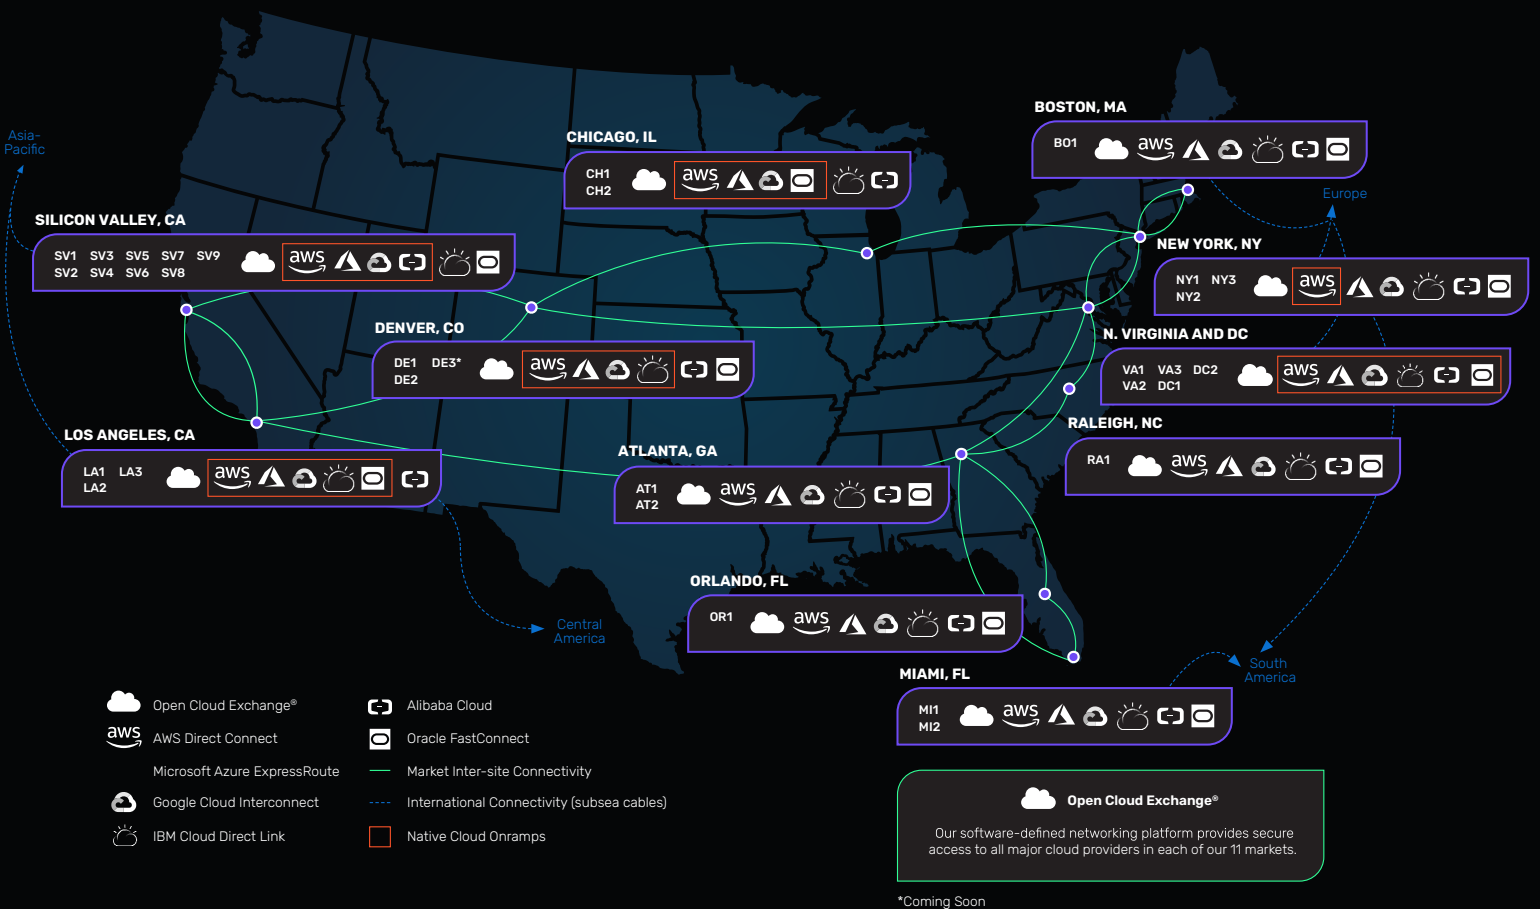

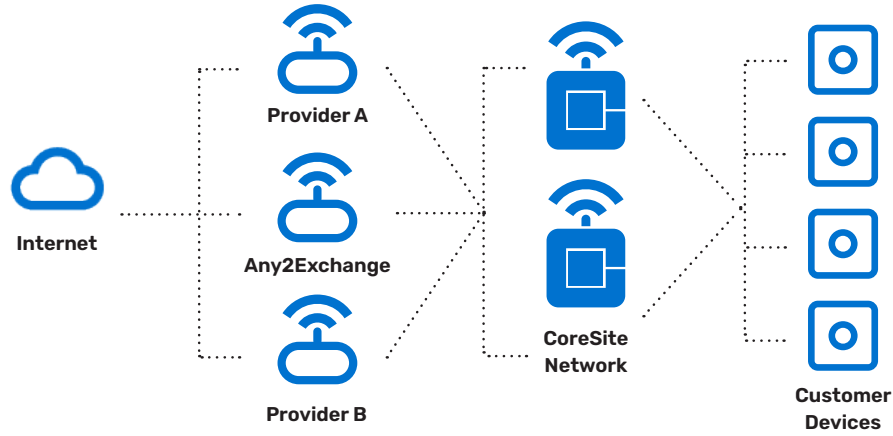

Fixed monthly fees and service rates

Includes static IPv4 and IPv6 addresses and supports BGP routing

BLENDED IP ARCHITECTURE - CORESITE SECURES REDUNDANT IP SOURCES
