

The Case for Colocation

Maximize hybrid cloud performance and asset value

Infrastructures for today's digital business must be reliable, secure and highly interconnected. HPC, analytics and AI inference are also driving demand for faster processing and lower latency—making colocation an ideal solution. With over two decades of operational excellence, CoreSite delivers purpose-built colocation with high-speed connectivity, reliability and a robust platform for seamless hybrid and multi-cloud deployments.

CORESITE COLOCATION DATA CENTERS ENABLE BUSINESSES TO

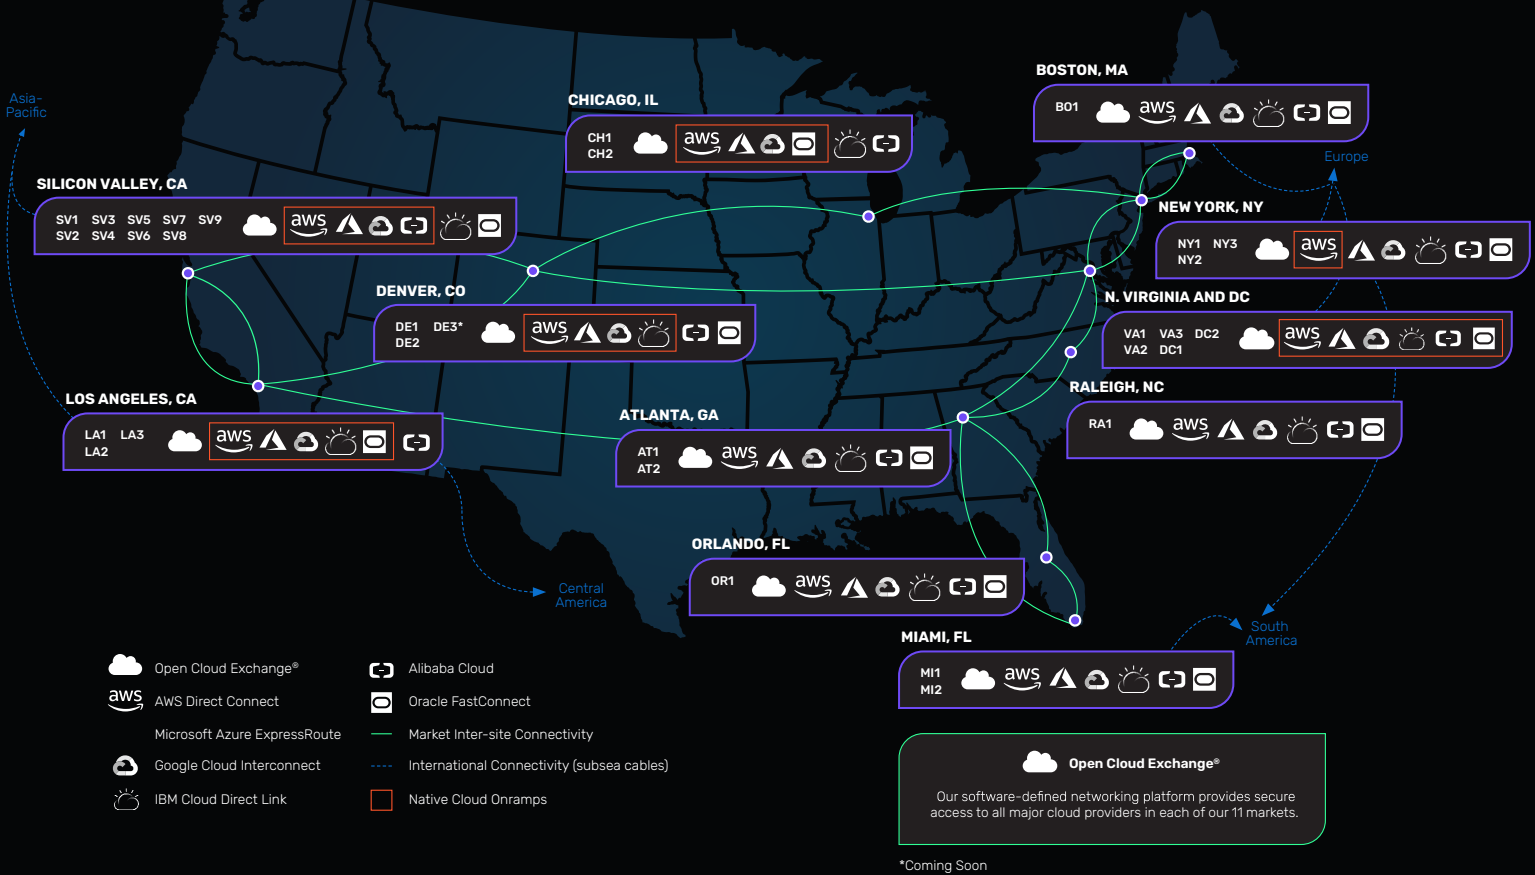

-  **Reduce Total Cost of Operation**
Control costs and avoid the hefty investment that comes with building and operating a data center.
-  **Assure Uptime**
Two feeds of power per cabinet, UPS redundancy, generators and geo-diversity add up to 100% uptime.
-  **Increase Connectivity**
Achieve secure and fast connections with a wide range of options, including multiple native ISPs, carriers and cloud providers.
-  **Directly Connect to Public Clouds**
On-site cloud on-ramps provide stable, low-latency connection to large public cloud providers and up to 70% data egress cost savings.*
-  **Improve Visibility**
CoreSite's customer service platform (MyCoreSite) offers full visibility into power utilization, environmental conditions, compliance documentation and security access auditing.
-  **Enhance Physical Security**
CoreSite physical security includes perimeter fencing, biometric scanners, exterior and interior cameras and around-the clock surveillance.

CoreSite provides purpose-built, scalable data centers that deliver the power density, interconnection and environment you need to support modern workloads and accelerate digital evolution.

* Cost savings are based on CoreSite cost comparisons using publicly available and private information and/or CoreSite customer reported costs savings and may not be indicative of the costs savings that may be experienced by every customer that switches to the applicable CoreSite service.

WHERE YOU PUT YOUR INFRASTRUCTURE MATTERS

Capitalize on 20 years of data center industry experience, exceptional customer support and operational excellence to get all the business advantages promised by IT modernization. CoreSite data centers support high-density, compute-intensive workloads, enabling our customers to be cloud-smart and reduce risk for adopting emerging use cases.

GET TO KNOW CORESITE

CoreSite delivers secure, reliable and high-performance colocation solutions that enable organizations to build and scale modern hybrid and multi-site IT architectures. With strategically located data centers across key U.S. markets, CoreSite provides direct access to leading public clouds, high-density compute environments optimized for AI and advanced workloads, and an extensive ecosystem of network, cloud and IT service providers. Whether supporting cloud adjacency, AI/ML infrastructure or distributed edge deployments, CoreSite delivers the performance, flexibility and scalability required for today's evolving infrastructure demands.
