

EDTECH IS REVOLUTIONIZING Teaching & Optimizing Student Outcomes

What is EdTech?

The EdTech (Educational Technology) industry is a rapidly growing sector that is transforming the way students learn and acquire knowledge.¹

Technology is a major driver of change

From the introduction of the printing press to the rise of online learning, technology has always had a profound impact on how we learn.²

\$1 TRILLION

The online learning or “eLearning” market size is set to cross \$1 trillion by 2028.³

99%

EdTech usage in K-12 schools has increased 99% since 2020.⁴

148

The average number of unique EdTech tools accessed by the individual educator is 148.³

79%

EdTech is used daily by 79% of teachers.⁵

Ready to Accelerate Your EdTech Adoption?

From virtual classrooms and online courses to artificial intelligence (AI) applications and research and development initiatives, education technologies are forever changing the way we learn in classrooms, training rooms and at home.

Learn how highly interconnected data centers along with cloud onramps and a robust ecosystem of network carriers can help accelerate your EdTech adoption and optimize outcomes for learners.
