

MLB Network Selects CoreSite as Its First Data Center Provider

March 26, 2015

Major League Baseball's 24/7 TV Network Deploys Critical IT Infrastructure and Applications with CoreSite

DENVER--(BUSINESS WIRE)--Mar. 26, 2015-- [CoreSite Realty Corporation](#) (NYSE:COR), a premier provider of secure, reliable, high-performance data center solutions across the U.S., today announced that MLB Network, Major League Baseball's award-winning 24/7 TV network, selected CoreSite's New York campus for its first outsourced data center deployment. The deployment was completed in September 2014.

MLB Network debuted on January 1, 2009 in a record-setting 50 million homes and is currently distributed in approximately 70 million homes throughout the U.S., Canada and Puerto Rico. MLB Network will use the deployment with CoreSite as an extension of its studio facility to enhance the production tools utilized in the creation of programming for the network.

"In addition to meeting our specific connectivity, latency and security requirements, this deployment in CoreSite's data center will allow MLB Network to scale our broadcast infrastructure quickly and efficiently as we continue to grow," said Mark Haden, VP, engineering and IT at MLB Network.

From their custom cage solution, MLB Network has access to the 41 natively deployed networks in CoreSite's New York data center campus as well as the CoreSite Open Cloud Exchange and Any2Exchange® for Internet peering. MLB Network also benefits from the added assurance of knowing that CoreSite's data center infrastructure was built above the 500-year flood plain.

"At CoreSite, our facilities and employees provide our customers with secure and reliable data center capacity coupled with high-performance connectivity and cloud solutions," said Brian Warren, SVP product and marketing at CoreSite. "In addition to delivering a superior technical solution, we partnered with MLB Network for the long term by building an equally robust and flexible solution around its application requirements. Through that collaborative work, we are pleased to have formed a lasting relationship with such a premiere enterprise."

CoreSite's New York data centers provide network-dense, cloud-enabled colocation capacity and the ability to scale within their combined 296,000+ square feet of space. Tethered together via dark fiber and lit interconnection services, CoreSite's New York data centers create one of the most scalable, low-latency campuses in the greater New York area. Forward Looking Statements

This press release may contain forward-looking statements within the meaning of the federal securities laws. Forward-looking statements relate to expectations, beliefs, projections, future plans and strategies, anticipated events or trends and similar expressions concerning matters that are not historical facts. In some cases, you can identify forward-looking statements by the use of forward-looking terminology such as "believes," "expects," "may," "will," "should," "seeks," "approximately," "intends," "plans," "pro forma," "estimates" or "anticipates" or the negative of these words and phrases or similar words or phrases that are predictions of or indicate future events or trends and that do not relate solely to historical matters. Forward-looking statements involve known and unknown risks, uncertainties, assumptions and contingencies, many of which are beyond CoreSite's control, that may cause actual results to differ significantly from those expressed in any forward-looking statement. These risks include, without limitation: the geographic concentration of CoreSite's data centers in certain markets and any adverse developments in local economic conditions or the demand for data center space in these markets; fluctuations in interest rates and increased operating costs; difficulties in identifying properties to acquire and completing acquisitions; significant industry competition; CoreSite's failure to obtain necessary outside financing; CoreSite's failure to qualify or maintain its status as a REIT; financial market fluctuations; changes in real estate and zoning laws and increases in real property tax rates; and other factors affecting the real estate industry generally. All forward-looking statements reflect CoreSite's good faith beliefs, assumptions and expectations, but they are not guarantees of future performance. Furthermore, CoreSite disclaims any obligation to publicly update or revise any forward-looking statement to reflect changes in underlying assumptions or factors, of new information, data or methods, future events or other changes. For a further discussion of these and other factors that could cause CoreSite's future results to differ materially from any forward-looking statements, see the section entitled "Risk Factors" in CoreSite's most recent annual report on Form 10-K, and other risks described in documents subsequently filed by CoreSite from time to time with the Securities and Exchange Commission.
