

## AWS Direct Connect Now Available in CoreSite's Northern Virginia Market

July 5, 2016

*AWS Direct Connect Now Available at CoreSite's Reston Facility and Across Entire Data Center Platform*

DENVER--(BUSINESS WIRE)--Jul. 5, 2016-- CoreSite Realty Corporation (NYSE:COR), a provider of secure, reliable, high-performance data center and interconnection solutions across the U.S., today announced CoreSite's [Reston Campus](#) as the latest [Amazon Web Services \(AWS\) Direct Connect](#) location serving the Northern Virginia market. Through AWS Direct Connect, CoreSite customers can directly access AWS cloud services over a private, enterprise-grade network connection. The [benefits](#) of direct access include reduced data-transfer costs, improved network security, and consistent network performance.

CoreSite is an Amazon Partner Network (APN) Technology Partner and has been providing its customers with direct access to AWS Direct Connect service since 2011. With this expansion, AWS Direct Connect is now directly available in four CoreSite markets with deployments in Los Angeles, New York/New Jersey, Silicon Valley and now Northern Virginia. Additionally, access to AWS Direct Connect is available in five major markets through CoreSite's Open Cloud Exchange.

AWS Direct Connect provides a dedicated network connection between an Enterprise's network and an [AWS Direct Connect location](#). CoreSite customers can access AWS Direct Connect through a cross connection or through elastic on-demand connectivity via the CoreSite Open Cloud Exchange. [AWS Direct Connect](#) provides a private, low-latency alternative to connecting over the public internet or backhauling from a corporate data center. Additionally, AWS Direct Connect allows customers to create logical separation between public and private environments through a single connection, providing dynamic access to the entire AWS secure cloud services platform. The AWS secure cloud services platform offers compute power, database storage, content delivery, and other functionality to enable hybrid-IT solutions, allowing enterprises to move more workloads to cloud environments.

"CoreSite customers with mission-critical requirements demand private, high-performance connectivity from their IT infrastructure to cloud providers as they deploy their hybrid-IT solutions," said Brian Warren, Senior Vice President of Product and Engineering at CoreSite. "AWS Direct Connect provides enterprises with the ability to establish a secure, dedicated connection that can reduce network costs, increase bandwidth throughput, and provide a more consistent, lower latency network experience than Internet-based, or long-haul connections."

CoreSite's [Northern Virginia data center campus](#) in Reston includes two facilities totaling over 390,000 square feet of data center space. Developed to create a reliable, high-performance option for enterprises, networks and cloud service providers looking to expand and reduce costs, CoreSite's Reston colocation campus provides direct, low-latency access to and from Ashburn and CoreSite's [data center in Washington, D.C.](#)

### About CoreSite

[CoreSite Realty Corporation](#) (NYSE:COR) delivers secure, reliable, high-performance data center and interconnection solutions to a growing customer ecosystem across eight key North American markets. More than 900 of the world's leading enterprises, network operators, cloud providers, and supporting service providers choose CoreSite to connect, protect and optimize their performance-sensitive data, applications and computing workloads. Our scalable, flexible solutions and 350+ dedicated employees consistently deliver unmatched data center options — all of which leads to a best-in-class customer experience and lasting relationships. ### Forward-Looking Statements

This press release may contain forward-looking statements within the meaning of the federal securities laws. Forward-looking statements relate to expectations, beliefs, projections, future plans and strategies, anticipated events or trends and similar expressions concerning matters that are not historical facts. In some cases, you can identify forward-looking statements by the use of forward-looking terminology such as "believes," "expects," "may," "will," "should," "seeks," "approximately," "intends," "plans," "pro forma," "estimates" or "anticipates" or the negative of these words and phrases or similar words or phrases that are predictions of or indicate future events or trends and that do not relate solely to historical matters. Forward-looking statements involve known and unknown risks, uncertainties, assumptions and contingencies, many of which are beyond CoreSite's control that may cause actual results to differ significantly from those expressed in any forward-looking statement. These risks include, without limitation: any adverse developments in local economic conditions or the demand for data center space in these markets; operational difficulties, including difficulties relating to information systems, internal processes and information security; significant industry competition; financial market fluctuations; and other factors affecting the real estate industry generally. All forward-looking statements reflect CoreSite's good faith beliefs, assumptions and expectations, but they are not guarantees of future performance. Furthermore, CoreSite disclaims any obligation to publicly update or revise any forward-looking statement to reflect changes in underlying assumptions or factors, of new information, data or methods, future events or other changes. For a further discussion of these and other factors that could cause CoreSite's future results to differ materially from any forward-looking statements, see the section entitled "Risk Factors" in CoreSite's most recent annual report on Form 10-K, and other risks described in documents subsequently filed by CoreSite from time to time with the Securities and Exchange Commission.
