

CoreSite Announces On-Net 100G Dedicated AWS Direct Connect Now Available in Four US Markets

April 13, 2021

Enabling High-Performance Hybrid IT to Multiple AWS Regions and Availability Zones
Providing Low Latency Edge-to-Edge Connectivity and Cloud Adjacency
Enhancing Autonomous Driving and Financial Services Trading Platforms
Optimizing Streaming Media and Content Distribution

DENVER--(BUSINESS WIRE)--Apr. 13, 2021-- **CoreSite Realty Corporation** (NYSE:COR) ("CoreSite," or the "Company"), a premier provider of secure, reliable, high-performance [data center](#), [cloud access](#) and [interconnection](#) solutions across the U.S., today announced upgraded on-net availability of AWS Direct Connect supporting 100 Gbps Dedicated Connections in four key markets – Los Angeles, New York, Northern Virginia, and Santa Clara – making it easier for customers to integrate their digital strategies and deploy high-performance hybrid applications across multiple geographies on Amazon Web Services (AWS). CoreSite will provide high-speed fiber interconnects and proximity to key Amazon regions and availability zones, which will enhance edge-to-edge performance and reduce latency between colocation and cloud environments.

The private high-bandwidth connectivity between AWS and CoreSite's data centers enables customers to lower operational overhead, while increasing capacity and performance delivered by 100 Gbps connections. This is particularly beneficial to applications that transfer large-scale datasets, such as for broadcast media distribution, autonomous vehicles, financial services trading and market information systems, and many other enterprises. The increasing enterprise need to provide a seamless customer experience, in a secure, reliable, and cost effective approach, makes these services especially valuable.

"CoreSite now has four of our key communication markets enabled with 100Gbps AWS Direct Connect service, which demonstrates our strength as a leading integration point for hybrid IT," said Steve Smith, CoreSite's Chief Revenue Officer. "We are excited to enable these capabilities to our customers and any enterprise looking to modernize their business-critical IT infrastructure. The fact that leading cloud providers like AWS Direct Connect choose to deploy their strategic edge services is another indication that customers can be confident of their strategic decision to choose CoreSite as their data center, interconnection and cloud integration provider."

Among the data center providers that offer AWS Direct Connect capabilities to customers, CoreSite offers diverse points of integration across multiple geographies and AWS Regions providing greater flexibility and scalability, as well as a proven record of accomplishment supporting the use cases in these industries with large production workloads to manage. For example, CoreSite is currently the data center provider for the leading autonomous vehicle platforms in the nation and the country's leading media and entertainments companies.

Forward Looking Statements

This press release may contain forward-looking statements within the meaning of the federal securities laws. Forward-looking statements relate to expectations, beliefs, projections, future plans and strategies, anticipated events or trends and similar expressions concerning matters that are not historical facts. In some cases, you can identify forward-looking statements by the use of forward-looking terminology such as "believes," "expects," "may," "will," "should," "seeks," "approximately," "intends," "plans," "pro forma," "estimates" or "anticipates" or the negative of these words and phrases or similar words or phrases that are predictions of or indicate future events or trends and that do not relate solely to historical matters. Forward-looking statements involve known and unknown risks, uncertainties, assumptions and contingencies, many of which are beyond CoreSite's control that may cause actual results to differ significantly from those expressed in any forward-looking statement. These risks include, without limitation: the geographic concentration of the Company's data centers in certain markets and any adverse developments in local economic conditions or the level of supply of or demand for data center space in these markets; fluctuations in interest rates and increased operating costs; difficulties in identifying properties to acquire and completing acquisitions; significant industry competition, including indirect competition from cloud service providers; failure to obtain necessary outside financing; the ability to service existing debt; the failure to qualify or maintain its status as a REIT; financial market fluctuations; changes in real estate and zoning laws and increases in real property tax rates; the effects on our business operations, demand for our services and general economic conditions resulting from the spread of the Novel Coronavirus ("COVID-19") in our markets, as well as orders,

directives and legislative action by local, state and federal governments in response to such spread of COVID-19; and other factors affecting the real estate industry generally. All forward-looking statements reflect the Company's good faith beliefs, assumptions and expectations, but they are not guarantees of future performance. Furthermore, the Company disclaims any obligation to publicly update or revise any forward-looking statement to reflect changes in underlying assumptions or factors, of new information, data or methods, future events or other changes. For a further discussion of these and other factors that could cause the Company's future results to differ materially from any forward-looking statements, see the section entitled "Risk Factors" in its most recent annual report on Form 10-K, and other risks described in documents subsequently filed by the Company from time to time with the Securities and Exchange Commission.
