

Mammoth Networks Joins the CoreSite Open Cloud Exchange to Provide Its Customers Direct Connectivity to Microsoft Azure ExpressRoute

August 16, 2017

DENVER--(BUSINESS WIRE)--Aug. 16, 2017-- CoreSite Realty Corporation (NYSE:COR), a premier provider of secure, reliable, high-performance [data center](#) and [interconnection](#) solutions across the U.S., today announced that Mammoth Networks, a provider offering a full suite of aggregation and WAN connectivity services to the lower 48 contiguous states, has joined [the CoreSite Open Cloud Exchange](#) at CoreSite's [Denver](#) data center campus. Mammoth Networks will leverage the CoreSite Open Cloud Exchange to provide its regional customers with direct connectivity to Microsoft Cloud services through [Azure ExpressRoute](#).

As a broadband aggregator, Mammoth Networks has direct interconnections with a large number of carriers at CoreSite, as well as through the peering exchanges. With its membership on the CoreSite Open Cloud Exchange, Mammoth Networks can now provide its direct customers, as well as its wholesale carriers, dedicated Azure ExpressRoute connections, which will allow them to build hybrid applications that span on-premises infrastructure and Microsoft Cloud resources without compromising privacy or performance.

"As a long-time customer, CoreSite has provided us with outstanding connectivity to the partners and carriers we do business with, and the diversity of carriers located at CoreSite's Denver data center campus is unmatched in the region," said Evan Biagi, Vice President of Colorado Operations at Mammoth Networks. "As cloud computing and related applications become more prevalent in the market place, it is important for us to be able to offer our customers the type of direct connections the CoreSite Open Cloud Exchange provides, thereby delivering the solutions our customers need to maximize their business performance."

CoreSite's Denver campus ([DE1](#) and [DE2](#)) is strategically located in downtown Denver and geographically close to Microsoft's new West Central U.S. Azure region, providing low-latency connectivity and optimized hybrid capabilities to businesses in Colorado and surrounding states. The presence of over 75 network, cloud and IT service providers within these two data centers makes CoreSite's colocation facilities the most integral points of interconnection in the Rocky Mountain region. These strategically centralized data centers are tethered to regional communication hubs offering customers secure, reliable, high-performance solutions for their mission-critical business applications as well as a secondary location to West or East coast deployments.

"We are pleased to continue to grow our relationship with Mammoth Networks as the company becomes a member of the CoreSite Open Cloud Exchange," said Brian Warren, Senior Vice President of Engineering and Product at CoreSite. "Through the CoreSite Open Cloud Exchange, members have access to high-performance connectivity to leading cloud service providers, with the benefit of enhanced security and reliability essential for hybrid-cloud configurations."

About Mammoth Networks

Mammoth Networks offers a full suite of aggregation and WAN connectivity services to the lower 48 contiguous states. Mammoth is circuit and carrier-agnostic, sourcing capacity from select carriers and driving those circuits through our own POPs and equipment so we can conduct line testing and confirm circuit health. We work only with carriers that are conscious of our focus and products, and are responsive and approachable. The end result is a product line that is a perfect match for Service Providers (ILECs, CLECs, DLECs, ISPs, Wireless ISPs, VoIP Providers, etc.) and multi-site enterprise businesses that are looking to expand beyond their current geographical scope, or drive greater physical and cost efficiencies into their current network architecture. Forward Looking Statements

This press release may contain forward-looking statements within the meaning of the federal securities laws. Forward-looking statements relate to expectations, beliefs, projections, future plans and strategies, anticipated events or trends and similar expressions concerning matters that are not historical facts. In some cases, you can identify forward-looking statements by the use of forward-looking terminology such as "believes," "expects," "may," "will," "should," "seeks," "approximately," "intends," "plans," "pro forma," "estimates" or "anticipates" or the negative of these words and phrases or similar words or phrases that are predictions of or indicate future events or trends and that do not relate solely to historical matters. Forward-looking statements involve known and unknown risks, uncertainties, assumptions and contingencies, many of which are beyond CoreSite's control that may cause actual results to differ significantly from those expressed in any forward-looking statement. These risks include, without limitation: any adverse developments in local economic conditions or the demand for data center space in these markets; operational difficulties, including difficulties relating to information systems, internal processes and information security; significant industry competition; financial market fluctuations; and other factors affecting the real estate industry generally. All forward-looking statements reflect CoreSite's good faith beliefs, assumptions and expectations, but they are not guarantees of future performance. Furthermore, CoreSite disclaims any obligation to publicly update or revise any forward-looking statement to reflect changes in underlying assumptions or factors, of new information, data or methods, future events or other changes. For a further discussion of these and other factors that could cause CoreSite's future results to differ materially from any forward-looking statements, see the section entitled "Risk Factors" in CoreSite's most recent annual report on Form 10-K, and other risks described in documents subsequently filed by CoreSite from time to time with the Securities and Exchange Commission.
