

CSC Launches 1.5MW Expansion at CoreSite's Boston and Northern Virginia Data Centers

February 16, 2012

Denver, CO – Feb. 16 – CoreSite Realty Corporation (NYSE: COR), a U.S. provider of powerful, network-rich data centers, today announced CSC has launched a 1.5 MW expansion at CoreSite's Boston and Northern Virginia data centers in support of a major global financial services client requirement and the deployment of the company's Trusted Cloud Services offering. Both deployments are fully operational with direct access to CSC Trusted Cloud Services currently available to CoreSite data center customers in Boston. CSC selected CoreSite based on its ability to tailor data center and interconnection products to CSC's specific requirements.

CSC's Trusted Cloud Services include three models that meet enterprise class requirements: off premises public and virtual private, on premises private and hybrid cloud. All cloud models share the same cloud fabric, the Vblock from the VCE Company, a standard rate card and service level agreements. All models are based on the pay-as-you-go pricing model and feature bronze, silver, gold and platinum support tiers. CSC provides infrastructure as a service, software as a service and platform as a service. CoreSite's Boston data center met all of the requirements necessary to facilitate the successful deployment of CSC Trusted Cloud Services including security, compliance, reliability and network availability.

For more information on CSC's Trusted Cloud Services, please visit www.csc.com/cloud.

"CoreSite provides industry-leading data center services that are validated by professional accreditations and exceed availability targets," commented Nick Wilkinson, president, Market and Product Strategy, CSC Managed Services Sector. "Its ability to quickly tailor solutions specific to our requirements has enabled us to create adaptive extensions to our data center portfolio and deliver data center environments capable of supporting the ever-changing, high-density demands of today's computing equipment."

"We're pleased to be able to continue to serve as a scalable platform for CSC as it grows its data center footprint to support its successful product launches and new business acquisition," commented Tom Ray, CoreSite president and chief executive officer. "CSC's selection of CoreSite for the CSC Cloud and its ongoing commitment to CoreSite represents the type of relationship we strive to develop with every CoreSite customer."

About CoreSite

CoreSite Realty Corporation (NYSE: COR) is a national provider of powerful, network-rich data centers, efficient interconnection services, and global peering opportunities. More than 700 customers such as Global 1000 enterprises, communications providers, cloud and content companies, financial firms, media and entertainment, healthcare, and Government agencies trust CoreSite to power, cool, connect, and secure their mission-critical IT assets. CoreSite data centers are catalysts for network growth, featuring established industry ecosystems with access to 200+ carriers and service providers resulting in more than 12,000 interconnections under management. The company tailors its data center product to unique customer requirements by way of a flexible offering that includes cage-to-cabinet colocation, private data centers and suites, and a responsive customer service and support infrastructure. CoreSite's portfolio comprises more than two million square feet, including space held for redevelopment and development, across 12 data centers in seven key U.S. economic centers.
